

Electric Water Boiler

This electric water boiler features an insulated body and a non-drip tap for dispensing. It is designed for heating and maintaining water temperature, and includes a power indicator light and concealed heating element.

Product Overview

Professional Boiling Water Solution

This stainless steel electric boiling water heater is designed for efficient, continuous operation in professional environments. It features a robust insulated body and a secure locking lid to ensure safety and thermal efficiency. With a non-drip tap for clean dispensing and a concealed heating element, it offers a reliable solution for heating and maintaining water temperature.

Design & Construction

Material	Stainless steel
Safety Features	Insulated body, Locking lid, Non-drip tap

Technical Specifications

Indicators	Power indicator light
Heating Element	Concealed
