

Electric Water Heater with Ceramic Lined Tank

This electric water heater is designed for harsh water conditions and features a ceramic-lined tank. Dual heating elements and a strong anode rod provide efficient and reliable hot water while protecting against corrosion.

Product Overview

Professional-grade water heater designed for high performance and durability.

Prime Series Electric Water Heater

The Prime Series Electric Water Heater is expertly designed to perform reliably in areas with challenging water chemistry. These units feature a high-density ceramic-lined tank and advanced Incoloy 800 heating elements to ensure longevity and consistent hot water delivery. With options for multiple capacities and power ratings, it provides an energy-efficient and durable solution for both residential and commercial hot water requirements.

Technical Specifications

Tank Capacity Options

- 40 gallon
- 66 gallon
- 80 gallon
- 120 gallon

Voltage

240 V

Available Heating Elements

Dual 4,500W, Dual 5,000W, Dual 6,000W

Performance & Efficiency

Energy-efficient design built to minimize operating costs.

Insulation Performance

40 kg/m³

Insulation Density

50 mm

Insulation Thickness

Heat Retention

Temperature drop is less than 7°C after one night

Quality & Standards

Certifications

UL • SASO • CB

Tank Warranty

7 years
