Overview

High-Efficiency Multi-Mode Water Heater

This electric water heater is designed for modern bathrooms, offering a blend of energy efficiency and versatile performance. Featuring a 5-star BEE standard and a specialized ECO mode, it ensures top-tier energy savings for residential use. With multiple operating modes including Timer and Clean, along with an optional remote control, it provides professional-grade convenience and reliability.

Performance & Power

Rated Power Options

- 500W
- 1000W
- 1500W
- 2000W
- 2500W

Max Water Temperature

75

Maximum Temperature

Rated Voltage

220-240V~, 110-120V~

Rated Pressure

0.8 MPa

Operating Modes

Operation Modes

Standard (STD) • Timer • ECO • Clean

Tank Technology

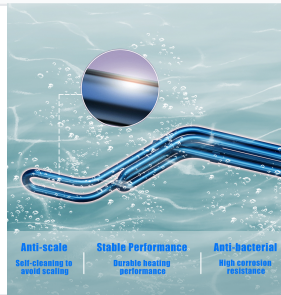

The exclusive single weld line design uses thickened SPCC material to reduce leakage risk by over 67% compared to standard tanks.

Blue Diamond Single Weld Line Tank

The inner tank is constructed from customized thickened SPCC material featuring an exclusive single weld line design. This innovation reduces the weld length by 75% and the number of weld lines by 67% compared to traditional triple-weld designs, significantly lowering the risk of leakage and making it ideal for high-rise applications.

Durability & Hygiene

Self-cleaning and anti-scale technology ensures stable heating performance and high corrosion resistance.

Maintenance & Hygiene Features

- Anti-scale self-cleaning mechanism
- Anti-bacterial properties
- High corrosion resistance
- Durable heating element performance

Technical Specifications

Waterproof Degree	IPX4
Rated Frequency	50/60Hz

User Interface

Display Type	LED Time and Temperature Display
Remote Control	Yes
