

# Electric Water Pressure Booster Pump

This electric water pressure booster pump is designed for efficient water boosting and transfer. It features a durable construction with a corrosion-resistant pump housing and a high-performance motor.

## Overview

### Reliable Water Boosting Solution

This electric water pressure booster pump is engineered for efficient water transfer and distribution in domestic settings. Compact and highly reliable, it is ideal for applications ranging from garden irrigation to supplying water from tanks. The unit comes fully equipped with an integrated flap-check valve for immediate use and is designed for long-term, low-maintenance operation.

## Technical Specifications

Suitable Fluids	Clean Water, Non-abrasive, Non-chemically aggressive
Installation Environment	Must be installed in an enclosed environment or sheltered from inclement weather

## Key Features

### Included Components

- Flap-check valve
- High-performance motor
- Corrosion-resistant housing

### Ideal Applications

Garden Irrigation • Domestic Water Distribution • Tank Water Drawing • Small Pressure Sets
