

# Electric Water Pump for Irrigation and Pressure Boosting

This electric water pump is designed for efficient water transfer and pressure boosting. It features a durable construction with a cast iron pump body and a corrosion-resistant impeller for long-lasting performance.

## Overview

### Reliable Water Solutions

This electric water pump is engineered for efficient water transfer and pressure boosting in both residential and light commercial settings. It is specifically designed to handle clean water, even in conditions where air may be present, ensuring consistent performance. With a durable cast iron body and corrosion-resistant components, this unit offers a quiet, reliable, and energy-efficient solution for irrigation, domestic water supply, and rainwater recovery systems.

## Technical Features

### Construction Materials

- Cast iron pump body
- Corrosion-resistant impeller

### Fluid Compatibility

Clean water, Non-chemically aggressive liquids

## Applications

### Recommended Applications

Domestic pressurisation • Civil water distribution • Rain water recovery • Irrigation systems

## Installation

### Installation Requirements

Must be installed in an enclosed environment or sheltered from inclement weather.
