

# Electric Water Transfer Pump

This robust electric water pump is designed for various water transfer applications. The pump features a finned motor for efficient cooling and long-lasting performance, making it suitable for residential, agricultural, and industrial water pumping needs.

## Product Overview

### Robust Electric Water Transfer Pump

This durable electric water pump is engineered for reliable performance across a variety of water transfer applications. Featuring a robust blue housing and an efficient finned motor for optimal cooling, it is built to withstand demanding environments. This versatile unit is suitable for residential, agricultural, and industrial pumping needs, providing a dependable solution for your fluid management requirements.

## Technical Specifications

### Design Highlights

- Integrated electrical connection box
- Finned motor design for long-lasting performance
- Durable blue housing finish

Suitable Applications	Residential, Agricultural, Industrial
Cooling System	Finned motor housing for enhanced heat dissipation
Housing Construction	Durable reinforced casing
Connection Interface	Standard inlet and outlet ports
