

Electric Welding High-Pressure Cut-Off Valve

This shutoff valve utilizes a welding structure for secure pipeline connection. Its sealing surface offers good sealing performance, long service life, and resistance to wear.

Product Overview

High-Performance Industrial Cut-Off Valve

This electric welding high-pressure cut-off valve is engineered for demanding industrial environments where reliability is paramount. Featuring a robust welded structure, it offers superior sealing performance, resistance to abrasion, and an extended service life even under extreme conditions. Its compact design ensures ease of maintenance while providing efficient operation for water, steam, and oil pipeline systems.

Technical Specifications

Key Features

- Electric welding structure
- High-temperature resistance
- High-pressure resistance
- Compact design
- Wear-resistant sealing surface

Performance Metrics

320 bar

Pressure Rating

Model Identifier	SW4100
Suitable Media	Water, Steam, Oil
