Product Overview

Heavy-Duty Electric Winch

This electric winch is engineered for demanding heavy-duty applications, featuring a robust full steel reducer gear and a three-stage planetary gear system. Designed for reliability, it includes an automatic screw cone braking action and a short series wound motor. With versatile power options and both wired and wireless remote control capabilities, it offers safe and efficient operation for off-road and industrial environments.

Technical Specifications

Construction

- Full steel reducer gear
- Short series wound motor

Power Input

DC 12V, DC 24V

Gear Reduction

Three stage planetary gear reducer

Features & Control

Control Options

Wired Remote • Wireless Remote • Free Spooling Clutch

Safety Mechanisms

- Automatic screw cone braking action
- Control box switch

Available Accessories

SWR tensioner, F type fixed remote
