Product Overview

Versatile Electric Lifting Solution

The KCD electric winch is designed for efficient, reliable lifting and pulling across various industrial and commercial environments. Featuring a compact, lightweight structure, it offers fast braking speeds and easy maintenance for maximum productivity. This versatile tool is ideal for residential construction, freight warehouses, and small workshops, providing a safe and powerful solution for moving heavy loads at any angle.

Technical Specifications

Lifting Capacity

500 kg

Max Capacity

Power and Performance

1.5 kW

Motor Power

220 V

Voltage

20 m

Lifting Height

Model Identifier

12ZLDDG6-002-2

Features & Design

Core Features

- High-torque electric motor
- Fast braking system
- Alloy steel hardened and forged hook
- User-friendly control pendant
- Emergency stop button
- Overload protection

Construction

Compact Structure • Lightweight • Durable Alloy Steel • Weather Resistant

Common Applications

Residential Construction, Freight Warehouses, Shopping Malls, Restaurants, Small Workshops, Loading and Unloading
