

Electric Wire Rope Hoist

Electric wire rope hoists are versatile lifting devices suited for various industrial tasks. The CD1 is a single-speed model, while the MD1 offers dual-speed operation for enhanced control.

Overview

Industrial Wire Rope Hoist

The CD1 and MD1 model wire rope hoists are versatile lifting devices engineered for demanding industrial environments. These units feature robust construction for reliable, long-term performance and are available in both single-speed (CD1) and dual-speed (MD1) configurations for precise control. Designed with safety and efficiency in mind, they include overload protection, durable wire rope, and high-efficiency motors to support various lifting requirements.

Technical Specifications

Lifting Capacity

2000 kg

Capacity

Available Models

CD1 (Single Speed), MD1 (Dual Speed)

Safety & Features

Key Features

- Overload protection system
- High-efficiency motor
- Durable wire rope
- Safety hook with latch
- Compact design
- Easy maintenance access
