Overview

Compact Electric Lifting Solution

This electric wire rope hoist is designed for reliable lifting in workshops, garages, and industrial assembly lines. It features a high-performance 460W motor with thermal protection and an automatic braking system to ensure safe and efficient operation. Built with durable, flame-retardant materials and an anti-twist aircraft wire rope, this hoist provides a safe solution for material handling and light equipment lifting.

Technical Specifications

Rated Voltage	120 V
Frequency	60 Hz
Input Power	460 W

Performance Metrics

Lifting Capacity

100 kg

Single Hook

200 kg

Pulley Hook

Lifting Height

12 m

Single Hook

6 m

Pulley Hook

Lifting Speed

10 m/min

Single Hook

5 m/min

Pulley Hook

Safety & Construction

Compliance & Approvals

UL1340 • ETL • CETL • TUV • IP54

Material Specifications

- 100% Copper wire motor
- High grade silicon steel motor core
- Galvanized aircraft wire rope (19x7 structure)
- Reinforced flame-retardant nylon components

Safety Features

Thermal Protection, Automatic Brake, Emergency Stop, Upper Limit Switch, Lower Limit Switch, Anti-twist Rope
