

Electric Wire Rope Hoist

This electric hoist is designed for lifting and lowering heavy loads. It features a robust motor, durable construction, and a user-friendly control pendant for precise operation.

Overview

Versatile Lifting Solutions

The CD1 and MD1 electric wire rope hoists are engineered for compact, smooth operation in demanding industrial and construction environments. These versatile units are compatible with a wide range of crane systems, including single-girder, double-girder, cantilever, and gantry cranes. While the CD1 model provides a reliable single-speed solution, the MD1 variant offers dual lifting speeds, making it ideal for precision adjustments during delicate operations.

Technical Specifications

Speed Control

- Single speed (CD1 model)
- Dual speed (MD1 model for precision)

Certifications

CE Approved

Crane Compatibility

- Single-girder cranes
- Double-girder cranes
- Cantilever cranes
- Gantry cranes
- Overhead rails

Available Models

CD1, MD1

Features

Safety & Control

- Overload protection
- User-friendly control pendant
- Robust motor design
