Overview

Compact Lifting Solution

The PA Micro Electric Rope Hoist is a versatile and compact lifting device designed for diverse applications, ranging from home and workshop use to construction and warehouse environments. Engineered for durability, it features a 100% pure copper motor for energy efficiency and a thickened A4 shell for robust protection. With built-in safety mechanisms like an emergency stop button and upper limit switches, this hoist ensures reliable and secure operation for loads up to 1200kg.

Performance Specifications

Lifting Capacity

200 kg

Min Capacity

1200 kg

Max Capacity

Standard Lift Height

3 m

Technical Details

Motor Construction

100% pure copper motor

Power Supply

220V / 50Hz

Safety & Features

Safety Mechanisms

- Emergency stop button
- Upper limit switch
- Anti-rotary wire rope
- Overload protection
