

Electric Wire Rope Hoist

The electric wire rope hoist is a compact and powerful lifting device designed for various applications. With a lifting capacity of up to 1000kg, this hoist is ideal for workshops, garages, and construction sites.

Product Overview

Professional Electric Lifting Solution

The electric wire rope hoist provides a compact and powerful solution for diverse lifting requirements in workshops, garages, and construction sites. Built with a robust motor and high-durability wire rope, it ensures consistent performance and reliability under demanding conditions. The system prioritizes operator safety through integrated features like emergency stop functionality and advanced overload protection.

Technical Specifications

Max Lifting Capacity

1000 kg
Capacity

Safety Features

Emergency Stop, Overload Protection

Operation Control

User-friendly remote control

Design and Utility

Design Advantages

- Compact form factor
- Easy installation
- High portability
- Robust motor construction

Model Identification

A1000
