

# Electric Wire Rope Hoist

This electric wire rope hoist features a main body frame welded by a professional section bar for a compact structure and good appearance. Its reducer has high-strength hardened and helical gears for low noise and long life.

## ADDITIONAL IMAGES

## Overview

Rigorous testing ensures the performance and reliability of the European type wire rope hoist under industrial loads.

### European Type Hoist Overview

This European type electric wire rope hoist features a compact, modular design engineered according to FEM standards for high performance and efficiency. Built with a lightweight cast aluminum housing and high-precision hardened helical gears, it offers excellent heat dissipation, low noise, and a long service life. It is an environmentally friendly, energy-saving solution designed for demanding industrial applications.

## Construction

Housing Material	Cast aluminum
Gear System	High precision hardened helical gears

## Safety & Intelligence

Key Safety Features	Overload protection, Motor over-temperature protection, Double upper limits, Electro-magnetic disk brake, Dustproof
Intelligent Monitoring	Yes

## Performance

### Control Type

Double speed • Inverter control

### Key Components

- Schneider contactor
- Heavy duty galvanized wire rope

## Maintenance

### Maintenance Profile

Maintenance-free design with minimal wearing parts
