

# Electric Wire Rope Hoist

This single-phase electric hoist is suitable for use in diverse locations. Its compact size, simple structure, and low noise operation, combined with easy installation, make it a versatile lifting solution.

## Product Overview

### Industrial Lifting Performance

This 220V electric wire rope hoist is engineered for efficient lifting in industrial and construction environments. It features a robust single-phase motor and an automatic brake system to ensure safety and precision during heavy-duty operations. With a 500kg lifting capacity and a compact design, it is an ideal solution for workshops, garages, and professional sites requiring reliable vertical material handling.

## Technical Specifications

### Rated Lifting Capacity

**500 kg**

Rated Capacity

Lifting Speed	20 m/min
Lifting Height	25 m
Duty Cycle	S3 50% 4 min

## Electrical & Mechanical

### IP Rating

IP65

Operating Voltage	220V
Cable Diameter	7 mm

## Features

### Safety & Operational Features

- Automatic brake system
- Emergency stop functionality
- Overload protection
- Single phase motor
- Industrial plug included
