

Electric Wire Rope Hoist with Remote Control

Electric hoist designed for lifting and moving heavy objects in agricultural and construction settings. Features a robust motor, durable cable, and remote control for easy operation.

Product Overview

Professional Electric Wire Rope Hoist

This high-performance electric wire rope hoist is engineered for demanding lifting and material handling tasks in agricultural and construction environments. Featuring a robust motor and high-durability cable, it ensures reliable operation for heavy-duty applications. The included remote control system enhances operator safety and efficiency by allowing precise control from a distance.

Technical Specifications

Model Designation	A250
Control Method	Remote Control

Applications

Suitable Industries	Agriculture, Construction, Material Handling
---------------------	--

Key Features

Primary Advantages

- Robust motor design for heavy-duty lifting
- High-durability wire rope construction
- Remote operation for enhanced safety
- Optimized for material handling efficiency
