

Electric Wire Rope Hoist with Remote Control

This compact electric hoist is designed for lifting applications in workshops, garages, and construction sites. It features a durable steel construction, remote control, and high-strength wire rope for reliable lifting performance.

Overview

Professional Lifting Solution

This compact electric wire rope hoist is engineered for demanding lifting applications in workshops, garages, and construction sites. Constructed with durable steel and high-strength wire rope, it ensures reliable performance and longevity. Safety is prioritized through integrated overload protection, an emergency stop function, and remote control operation.
