

Electric Wood Router with Variable Speed

This electric router features a powerful 1250W motor and a seven-speed switch for precise control. It has a plunging depth of 36mm with dust extraction and 47mm without, and it includes 8mm and 12mm collets.

Product Overview

Professional Electric Wood Router

This powerful 1250W electric wood router is designed for precision woodworking, offering versatile performance for tasks like edge profiling, groove cutting, and pattern following. It features a variable speed control with seven distinct settings, allowing for optimal material removal across a wide range of applications. With a robust aluminum base and integrated dust extraction, this tool ensures both stability and a cleaner working environment for professional users.

Technical Specifications

Input Power

1250 W
Power

9 A
Current

No-load Speed Range	12000-29500 min-1
Blade Diameter	12 mm
Speed Control	7

Capabilities

Plunging Depth

Configuration	Depth
With dust extraction	36mm
Without dust extraction	47mm

Included Collets

- 8mm
- 12mm

Features

Key Features	Variable Speed Switch, Aluminum Base, Vacuum Dust Extraction, Parallel Guide, Plunging Lock, Graduated Depth Guide
