Product Overview

Reliable Anchoring for LV-ABC Cables

This anchor bracket is specifically engineered for use in electrical power transmission and distribution systems, providing a secure and reliable anchoring point for LV-ABC cables. Constructed from durable materials, the bracket is built to withstand demanding environmental conditions, offering excellent resistance to corrosion and wear. Its robust design features strategically placed mounting holes, ensuring both ease of installation and long-term stability for heavy-duty applications.

Technical Specifications

Application Suitability

Overhead systems • Underground systems • Heavy-duty applications

Compatible Cable Type

LV-ABC cables

Material Finish

Cast metal

Installation Features

Robust design, Multiple mounting holes, Easy installation
