

Electrical Cable Joint

This cable joint is designed for connecting electrical cables securely and reliably. It is suitable for various cable sizes, ensuring a robust and weatherproof connection.

Product Overview

Professional Electrical Cable Joint

This high-quality cable joint is engineered for connecting electrical cables with maximum security and reliability. Designed to provide a robust and weatherproof connection, it is ideal for both industrial and commercial applications that demand long-lasting durability. The versatile design accommodates a wide range of cable sizes, ensuring a high-performance solution for complex wiring requirements.

Technical Specifications

Supported Cable Sizes	10-25mm, 35-50mm, 50-70mm, 70-95mm
Model Series	CJ12

Performance & Protection

Protection Features

Weatherproof • Secure Connection • Durable

Application Details

Ideal Applications

- Industrial electrical installations
- Commercial wiring systems
- Outdoor weatherproof connections
- Heavy-duty cable splicing

Connection Type	Secure Electrical Jointing
