## Product Overview

### V9 Series Distribution Enclosure

This metal wall panel serves as a robust enclosure for electrical supply distribution within buildings. Designed for professional electrical installations, the interior features a pre-fitted clip tray and DIN rail, facilitating the mounting of MCBs and other essential devices. The unit is constructed from a 1.0mm thick powder-coated iron sheet, ensuring durability and a clean, minimalist aesthetic suitable for various indoor environments.

## Technical Specifications

### Rated Current

**63 A**

Rated Current

### Ingress Protection

IP 30

### Rated Voltage

230V/400V

### Rated Frequency

50Hz/60Hz

### Maximum Opening Angle

120 degrees

## Construction & Design

### Material Composition

Component	Material
Enclosure Body	1.0mm Thick Iron Sheet
Internal Bars	Copper
