

Electrical Distribution Panel

This electrical distribution panel manages and distributes electrical power. It serves as a central hub for power distribution, promoting safety and reliability.

Product Overview

Professional Electrical Distribution Panel

This high-performance electrical distribution panel is engineered for reliable power management in industrial and commercial environments. Designed to facilitate efficient circuit control and safety, the unit provides a robust foundation for electrical infrastructure. Its modular architecture ensures ease of maintenance and scalability for complex power distribution needs.

Financial Performance Metrics

Net Cash Flows from Operating Activities

5.55 Billion RMB
Operating Cash Flow

Net Cash Flows from Investing Activities

-50.42 Billion RMB
Investing Cash Flow

Net Cash Flows from Financing Activities

46.57 Billion RMB
Financing Cash Flow

2008 Cash Flow Summary

Activity Type	Inflows (Billion RMB)	Outflows (Billion RMB)
Operating Activities	82.43	76.88
Investing Activities	3.23	53.65
Financing Activities	151.01	104.44
