

Electrical Junction Boxes for Outlets and Switches

These electrical junction boxes, made from non-conductive plastic, accommodate single and double gangs. They facilitate flush mounting of electrical outlets and switches in both residential and commercial settings.

Product Overview

Professional Electrical Junction Boxes

These durable electrical junction boxes are engineered for the flush mounting of outlets and switches in both residential and commercial wall applications. Constructed from high-quality, non-conductive plastic, they ensure safety and longevity in electrical installations. The design features pre-scored knockouts for simplified cable entry and internal mounting posts to guarantee secure device attachment.

Technical Specifications

Material	Non-conductive plastic
Mounting Type	Flush mount
Applications	Residential, Commercial, Electrical Wiring

Models and Variants

Model Range

Model ID	Type
Sc1103	86 Double Gang
SC1104	146 Box

Features

Design Highlights

- Pre-scored knockouts for easy cable entry
- Internal mounting posts for secure installation
- Non-conductive material construction
