Product Overview

Professional Electrical Raceway Solution

Electrical Metallic Tubing (EMT) is an unthreaded steel raceway designed for the physical protection and routing of electrical cables and conductors. It serves as a lightweight, cost-effective alternative to rigid metal conduit, offering excellent mechanical strength for both exposed and concealed wiring installations. This versatile conduit is easy to cut and bend, making it ideal for commercial and industrial construction projects.

Technical Specifications

Standards & Certifications

UL 797 • ANSI C80.3

Available Trade Sizes	1/2 inch to 4 inches
Nominal Length	10 ft
Surface Finishes	Pre-galvanized (PG), Hot dip galvanized (HDG)

Installation & Usage

Compatible Fittings

- Set-screw couplings
- Compression-type couplings
- Set-screw connectors
- Compression-type connectors

Installation Types	Exposed, Closed/Concealed, Dry Locations, Damp Locations
--------------------	--

Key Features

Corrosion Protection	Yes
Customization	Wall thickness and length can be customized per client requirements
