

Electrical Steam Iron with LED and Metal Accents

This electrical steam iron offers a large water tank and variable steam control for efficient garment care. It includes a non-stick soleplate, anti-drip function, auto shut-off, an LED strip, and metal decoration.

Overview

Professional Garment Care

This high-performance electrical steam iron is engineered for efficient and effective garment care in professional environments. It features a versatile range of ironing modes, including vertical steam and adjustable steam control, ensuring optimal results across various fabric types. With safety-focused enhancements like anti-drip and auto-shut-off, this iron combines durability with user-friendly operation.
