

Electrical Welding Pliers

These are industrial grade electrical welding pliers. They are designed for holding welding materials securely.

Product Overview

Professional Electrical Welding Pliers

These professional-grade electrical welding pliers are engineered for high-performance welding applications. Featuring a robust red copper cast conductor, the tool ensures exceptional electrical conductivity for consistent and reliable results. The handle is constructed from specialized insulation material, prioritizing operator safety and comfort during extended use.

Technical Specifications

| | |
|--------------------|-----------------------------|
| Conductor Material | Red copper cast |
| Handle Insulation | Special insulation material |

Performance Features

Key Features

- High electrical conductivity
- Durable copper construction
- Safety-focused handle design
