

Electrical Wire Terminal Block

These terminal blocks facilitate the connection and termination of electrical wires. Each block features a screw-down connector, ensuring secure wire connections within its durable plastic housing.

Product Overview

Professional Terminal Solutions

These terminal blocks provide a reliable solution for connecting and terminating electrical wires in various industrial and commercial applications. The strip design ensures organized wiring, while the integrated screw-down connectors guarantee a secure, high-integrity electrical connection. Housed in a durable plastic body, they are engineered for easy installation and long-term performance.

Technical Specifications

Housing Material	Durable Plastic
Connection Mechanism	Screw-down connector
Configuration	Terminal Strip, Modular
Color	White
