

# Electro-Hydraulic Orange Peel Grab for Scrap Handling

Electro-hydraulic orange peel grabs are designed for loading and discharging scrap, mixed scrap, compacted car bodies and small rocks. It is fitted on cranes with a single drum.

## ADDITIONAL IMAGES

## Product Overview

### High-Performance Scrap Handling

This electro-hydraulic orange peel grab is engineered for the efficient loading and discharging of diverse materials, including mixed scrap, compacted car bodies, and small rocks. Designed for compatibility with single-drum shipboard cranes, it utilizes advanced 3D virtual design and interference checking to ensure structural integrity and operational precision. The system is highly adaptable, with specialized models available to suit specific material handling needs ranging from stones and pig iron to woodchips.

## Technical Specifications

### Design Technology

3D Virtual Design • Interference Checking

### Compatible Materials

Mixed Scrap, Compacted Car Bodies, Small Rocks, Pig Iron, Waste, Woodchips

### Crane Compatibility

Single drum shipboard cranes

## Customization & Ordering

### Information Required for Quote

- Lifting material type
- Cubage (volume) of the grab
- Maximum lifting weight of the crane
- Working environment details

### Accessory Support

Yes
