Overview

Electrolyzed Water Disinfectant Generator

This innovative disinfectant generator produces a safe and effective cleaning solution at home by electrolyzing a mixture of water and salt. With a simple one-button operation, the device creates a powerful disinfectant in just 6 minutes, capable of eliminating 99.9% of bacteria and viruses. It is a versatile, eco-friendly solution suitable for sanitizing kitchen surfaces, bathroom areas, furniture, children's toys, and pet supplies.

Technical Specifications

Working Time

6 minutes

Electrolysis Cycle

Power Rating	5 W
Power Supply	AC220V / DC5V 1A
Capacity	250 ml

Physical Dimensions

Color

Pearl White

Product Dimensions	245mm x 90mm
Packaging Dimensions	115mm x 75mm x 270mm

Usage Information

Recommended Applications

- Kitchen and bathroom surfaces
- Furniture disinfection
- Air sanitization
- Children's toys
- Pet supplies
- Floors and carpets
