

Electromagnetic Relay

Electromagnetic relays designed for various switching applications. These relays feature a transparent housing allowing visual inspection of internal components, and are mounted on sockets with screw terminals for secure connections.

Overview

ZY Series Electromagnetic Relays

The ZY series electromagnetic relays are precision-engineered components designed for reliable switching across diverse industrial applications. Featuring a durable, transparent housing, these relays allow for easy visual monitoring of internal states during operation. They are designed for secure installation using dedicated mounting sockets with reliable screw terminals to ensure stable electrical connections.

Technical Specifications

Key Performance Metrics

10 A

Rated Current

250 VAC

Rated Voltage

Available Models

- SYF08A-F
- SYF11A1-E
- STF14A
- SKB14-E

Mounting Method

Socket mounting with screw terminals

Design Features

Transparent Housing, Visual Inspection Window
