

Electronic Access Control Key Fob with Thermometer

Electronic key fobs are designed for access control and security systems. They feature a robust plastic housing, integrated keyring, and a tactile button interface.

Product Overview

Electronic Access Control Key Fob

This compact electronic key fob combines secure access control functionality with an integrated thermometer. Designed for portability, the device features a tactile interface and announces temperature readings in a clear, human voice. It is an ideal solution for applications requiring both identification and environmental monitoring in a single, durable package.
