

Electronic Acupuncture Therapy Device for Pain Relief

This electronic acupuncture therapy device is designed for pain relief and muscle stimulation. It features a digital display for easy monitoring and adjustment of settings.

Product Overview

Professional Therapy Solution

This electronic acupuncture therapy device is engineered to provide effective pain relief and targeted muscle stimulation. Equipped with a clear digital display, it allows for precise monitoring and adjustment of treatment parameters to suit various patient needs. Designed for versatility, it is an ideal solution for physiotherapy clinics, rehabilitation centers, and home healthcare environments.

Technical Specifications

Power Input	12 V DC
Output Frequency	1-100 Hz
Pulse Width	0.1-1 ms

Features

Device Features

- Digital display for easy monitoring
- Adjustable treatment modes
- Variable intensity levels
- Includes multiple electrode pads and attachments

Intended Use	Pain Relief, Muscle Stimulation, Physiotherapy, Rehabilitation, Home Healthcare
