

Electronic Chemical Dosing Pump

Electronic dosing pump designed for precise chemical injection in various applications. It features a digital control panel for easy operation and monitoring.

Overview

Professional Chemical Dosing Solution

This electronic chemical dosing pump is engineered for precise, reliable chemical injection across a variety of professional applications. Featuring an intuitive digital control panel, it allows for seamless operation and monitoring of dosing cycles. Built with durable materials, it ensures consistent performance in demanding environments like water treatment, industrial manufacturing, and agricultural settings.

Performance

Flow Rate Capacity

6 L/h
