

Electronic Detector

This electronic detector is a sophisticated instrument designed for precise detection and analysis. It features a user-friendly interface with a digital display and multiple input channels, making it suitable for various laboratory and industrial applications.

Overview

BJ-1800 Electronic Detector

The BJ-1800 is a sophisticated electronic instrument engineered for high-precision detection and analysis. Designed with a user-friendly interface and a clear digital display, this device supports multiple input channels for versatile operation. Its robust construction ensures reliable performance and accurate measurements across various laboratory and industrial environments.

Technical Specifications

Model Number	BJ-1800
Interface	Digital Display
Input Channels	Multiple
Suitable Applications	Laboratory, Industrial
