

Electronic Device Axial Flow Fan

This axial flow fan provides efficient heat dissipation for electronic devices. It features a durable construction and optimized blade design for maximum airflow and minimal noise.

Overview

High-Performance Cooling Solution

This axial flow fan is engineered for efficient heat dissipation in a wide range of electronic devices. Featuring a durable construction and an optimized blade design, it delivers maximum airflow while maintaining minimal noise levels. It is a reliable choice for cooling computer cases, power supplies, and various industrial equipment, ensuring long operational life.

Technical Specifications

Motor Type	DC Brushless
Certifications	CE
Country of Origin	China

Key Features

Suitable Applications

- Computer cases
- Power supplies
- Industrial equipment
