

Electronic Electricity Meter

This electronic electricity meter is designed for residential and commercial applications. It supports a voltage range of 3-230/400V and a current range of 0.25-5(85)A.

Product Overview

Professional Electronic Electricity Meter

This electronic electricity meter is engineered for both residential and commercial energy monitoring applications. Designed to withstand demanding environments, it operates reliably within a wide temperature range of -40°C to +70°C. The device features integrated system and status indicators, along with a convenient 63A switch for electrical control.

Electrical Specifications

Voltage Range	3-230/400V
Current Range	0.25-5(85)A
Operating Frequency	50 Hz
Max Switch Capacity	63 A

Performance Metrics

Key Performance Metrics

500 imp/kWh

Impulse Rate

10000 imp/kWh

Pulse Output

Compliance and Environment

Operating Temperature	-40°C to +70°C
Compliance Standards	TCM 221/08-4611
Manufacturing Year	2009
