

Electronic Insect Killer Trap with UV Light

This electronic trap eliminates flying insects using a high-voltage grid and UV light. It's designed for indoor use and includes a removable collection tray for easy cleaning.

Product Overview

JB60 Electronic Insect Killer

The JB60 is a professional-grade electronic insect trap designed to effectively manage flying insects in indoor environments. Utilizing UV light technology to attract pests, it features a high-voltage grid for immediate elimination and a protective cage for operator safety. This durable, metal-constructed unit is ideal for homes, offices, and commercial enclosed spaces.
