

Electronic Meter for Liquid and Gas Measurement

This meter accurately measures liquid and gas consumption. It features a digital display and mechanical counter for reliable readings in residential or commercial settings.

Product Overview

Precision Measurement Solution

This electronic meter is engineered for the accurate measurement of both liquid and gas consumption. It features a dual-interface design, incorporating both a digital display and a mechanical counter to ensure data redundancy and reliability. Designed for versatile use, it is suitable for both residential and commercial applications, providing precise readings essential for effective billing and consumption monitoring.

Technical Specifications

Model Number	GD-1-JZ-3
Serial Number	PF11A0914
Initial Counter Value	37

Features

Suitable Applications
Residential • Commercial

Display Methods Digital Display, Mechanical Counter
