

Electronic Mosquito Repellent Plug-In

This electronic mosquito repellent plugs into a standard outlet. It repels mosquitoes with high-frequency sound, without chemicals, and features a compact design with an indicator light.

Product Overview

Effective Ultrasonic Protection

This electronic mosquito repellent utilizes advanced ultrasonic wave technology to create an environment that naturally drives mosquitoes away. Designed for convenience, the device plugs directly into standard wall outlets and operates silently, making it safe for both humans and pets. With a compact form factor and energy-efficient performance, it provides reliable protection for indoor spaces up to 30 square meters.

Technical Specifications

Power Supply	AC 220V-240V
Power Consumption	0.5 W
Frequency Range	3KHZ-20KHZ
