

Electroplated Diamond Cutting Blade

This electroplated diamond blade is designed for cutting a variety of materials. It features cooling holes to reduce heat buildup and extend blade life.

Product Overview

Professional Cutting Solution

The SEB001 Electroplated Diamond Cutting Blade is engineered for precision and durability across a variety of material applications. Featuring a robust steel core coated with high-quality electroplated diamond grit, it ensures clean, efficient cuts. The design includes integrated cooling holes to effectively manage heat buildup, significantly extending the service life of the blade during demanding operations.

Technical Specifications

Compatibility

- Angle Grinders
- Compatible Power Tools

Key Features

Electroplated Diamond Grit, Durable Steel Core, Heat Dissipation Holes, Precision Cutting

Usage

Suitable Applications

Professional Use • DIY Projects
