

Electroplated Diamond Grinding Wheel

This electroplated diamond grinding wheel is designed for efficient material removal and surface preparation. It features durable construction with high-quality diamond grit for optimal performance and extended life.

Product Overview

High-Performance Grinding Solution

This electroplated diamond grinding wheel is engineered for efficient material removal and precise surface preparation. Constructed with high-quality diamond grit, it provides exceptional durability and long-lasting performance for demanding professional tasks. The wheel is designed to optimize cooling and dust extraction, significantly enhancing user safety and operational productivity.

Technical Specifications

Primary Applications

- Grinding
- Shaping
- Smoothing

Tool Compatibility

Angle Grinders • Power Tools

Compatible Materials

Stone, Concrete, Ceramics

Performance Features

Key Performance Metrics

1 Electroplated

Diamond Coating Type
