

Electroplated Diamond Grinding Wheel

This electroplated diamond grinding wheel is designed for precision grinding and shaping of hard materials. It features a durable steel core and a uniform layer of diamond particles for consistent cutting and an extended lifespan.

Product Overview

Precision Electroplated Diamond Grinding Wheel

This electroplated diamond grinding wheel is engineered for high-precision grinding and shaping of challenging materials such as glass, ceramics, stone, and composites. Featuring a durable steel core with a uniform diamond particle coating, it ensures consistent cutting performance and an extended operational lifespan. The wheel is designed for versatility, supporting both wet and dry grinding applications to suit various industrial workflows.

Dimensions & Compatibility

Diameter	100 mm
Hole Size	20 mm
Adapter Compatibility	20mm to 15mm

Technical Specifications

Available Blank Thickness

- 0.6mm
- 0.8mm
- 1mm

Available Coating Width

- 16mm
- 18mm
- 20mm
- 25mm

Performance Features

Usage Mode

Wet Grinding • Dry Grinding

Suitable Applications

Glass, Ceramics, Stone, Composites
