

# Electroplated Diamond Saw Blade

This electroplated diamond saw blade is designed for cutting hard and brittle materials. It features a steel core with a diamond abrasive coating applied through electroplating.

## Product Overview

### Precision Cutting Solution

This electroplated diamond saw blade is engineered for high-performance cutting of hard and brittle materials. Utilizing a durable steel core with a high-quality diamond abrasive coating, it ensures both precision and efficiency during operation. It is compatible with a wide range of power tools, making it a versatile choice for professional cutting applications.

## Technical Specifications

### Suitable Materials

- Hard materials
- Brittle materials

### Available Options

Multiple Sizes • Various Grit Options

### Construction Method

Electroplated diamond abrasive coating

### Core Material

Steel

### Tool Compatibility

Power Tools, Angle Grinders, Circular Saws
