

Electrostatic Powder Coating System

This powder coating system is a comprehensive solution for applying powder coatings to various surfaces. It is designed for efficient and uniform coating application, providing a durable and aesthetically pleasing finish.

Overview

Professional Electrostatic Powder Coating Solution

The Electrostatic Powder Coating System is a comprehensive, professional-grade solution designed for applying high-quality powder coatings to a variety of metallic surfaces. Engineered for efficiency and precision, the system ensures uniform coverage and a durable, aesthetically pleasing finish. It is an ideal choice for diverse industrial applications, ranging from automotive components and metal furniture to heavy-duty industrial equipment.

Technical Capabilities

Key Performance Metrics

100 %

Coating Efficiency

Control Features

- Adjustable voltage settings
- Adjustable current settings
- Integrated control unit

Applications

Suitable Applications

Automotive Parts, Metal Furniture, Industrial Equipment

Safety & Compliance

Safety Warnings

High Voltage Hazard • Do Not Touch
