

Elevator Car Ceiling with Integrated Lighting and Ventilation

Elevator car ceiling features a square design with integrated lighting and ventilation. It includes a metallic frame with slots for air circulation and a central lighting array divided into four sections.

Product Overview

Modern Elevator Car Ceiling

This elevator car ceiling is designed to provide both aesthetic appeal and functional performance for modern elevator interiors. Featuring an integrated lighting array and built-in ventilation grilles, it ensures optimal airflow and illumination within the cabin. The robust metallic frame construction offers durability while maintaining a clean, professional look suitable for commercial and residential elevator installations.
