

Elevator Climate Control Unit with Digital Display

This is an elevator climate control unit. It features a digital display and controls for temperature adjustment, fan speed, and mode selection.

Product Overview

Advanced Elevator Climate Control

This automotive-grade climate control unit is designed specifically for elevator environments, ensuring optimal passenger comfort. It features an intuitive digital display and precise controls for temperature, fan speed, and airflow modes. With dedicated settings for A/C, recirculation, and defrost, this unit provides reliable and efficient climate management for modern elevator systems.

Control Interface

Available Functions

- Temperature Adjustment
- Fan Speed Control
- A/C Activation
- Recirculation Mode
- Defrost Mode
- Auto/Off Functionality

Display Type	Digital Display
Interface Buttons	AUTO, OFF, A/C, MODE
