

Elevator Traction Motor

High-efficiency electric motor designed for elevator applications, featuring a robust construction for reliable performance in demanding environments. The motor incorporates enhanced cooling fins for optimal thermal management and extended lifespan.

Overview

High-Efficiency Elevator Traction Motor

This high-efficiency electric motor is specifically engineered for demanding elevator applications, ensuring reliable performance and longevity. It features a robust construction designed for heavy-duty use, complemented by enhanced cooling fins that optimize thermal management. With integrated lifting eyes for simplified installation and maintenance, this motor delivers the smooth and precise operation required for modern elevator systems.

Technical Specifications

Primary Application

Elevator Systems • Traction Drive

Model

YZR3

Design & Features

Installation Features

- Integrated lifting eyes
- Simplified maintenance access
- Robust construction

Thermal Management

Enhanced Cooling Fins, Optimized Heat Dissipation
