

Emergency and Indicator Light

This emergency light and indicator light is designed for critical illumination needs. It features a spherical, multi-faceted lens for enhanced light dispersion and visibility.

Product Overview

Designed for Critical Reliability

This emergency and indicator light is engineered for demanding environments where visibility is paramount. Featuring a specialized spherical, multi-faceted lens, it ensures superior light dispersion to provide clear signaling and illumination when it matters most. Built with durable construction materials, this unit offers the robust performance required for security and emergency lighting applications.

Technical Features

Build Quality

Robust Construction • Industrial Grade

Lens Design

Spherical, multi-faceted lens for enhanced light dispersion

Primary Applications

Emergency Lighting, Security Lighting, Indicator Signaling
