

Emergency and Security Lighting with 166-Degree View

This emergency and security lighting equipment is designed for wide illumination applications. It features a 166-degree viewing angle, ensuring extensive coverage in emergency situations.

Product Overview

Professional Emergency Illumination

The TK-10T emergency security lighting is designed to provide reliable, automated illumination during power failures. Featuring dual 10W fluorescent tubes and a 360-degree light distribution pattern, it ensures comprehensive area coverage. The unit includes a built-in torch, a durable metal handle, and advanced protection circuitry, making it a robust solution for emergency preparedness.
